Robert Kennedy Jr. reavered as a highly respected president and his Democratic nomina-

a highly respected president and his Democratic nomination tragically cut short by an assassin's bullet in 1968, Kennedy has embarked on a bold endeavor to challenge the current political paradigm and potentially catalyze a nationwide movement for change.

"Empowering Black Americans will be a cen-

tral focus for me, especially in eradicating the pervasive fear of perilous encounters with law enforcement," Kennedy emphasized during an interview with the Black Press of America.

He pledged to end qualified immunity, a lia-

ternational protection shielding police officers from personal liability in legal proceedings. "Incentives for reform are lacking under the current sys-

tem," he asserted. "We must eliminate qualified immunity, compelling individuals to weigh their accountability in every interaction." An ex-

day economic system should incentivize virtu-

cast protests, organizing marches, and forming a bloc as a third force.

"Kennedy dropped out of the race on Labor Day this year, but his supporters continued to campaign for him. He often made appearances at rallies and events across the country, where he spoke about his beliefs and platform.

Kennedy's campaign focused on several key issues, including healthcare reform, climate change, and education. He also emphasized the importance of grassroots organizing and community engagement.

Kennedy's run for president marked a significant moment in the political landscape, as he sought to unite a diverse coalition of voters around his vision for a more inclusive and equitable future.
